The FoT Forest Project

A data analytics and matchmaking platform connecting the alumni network of Founders of Tomorrow

This project focuses on…

- Features that will **help the alumni to connect and find each other**.
- When needed, help FoT management to **orchestrate and facilitate** more effectively **potential collaborations**.
- Contribute to increase the **quality and quantity of new collaborations** in the network, which will hopefully lead into the creation of new value through creative and collective problem solving.

"~~Can´t~~ see the forest for the trees"

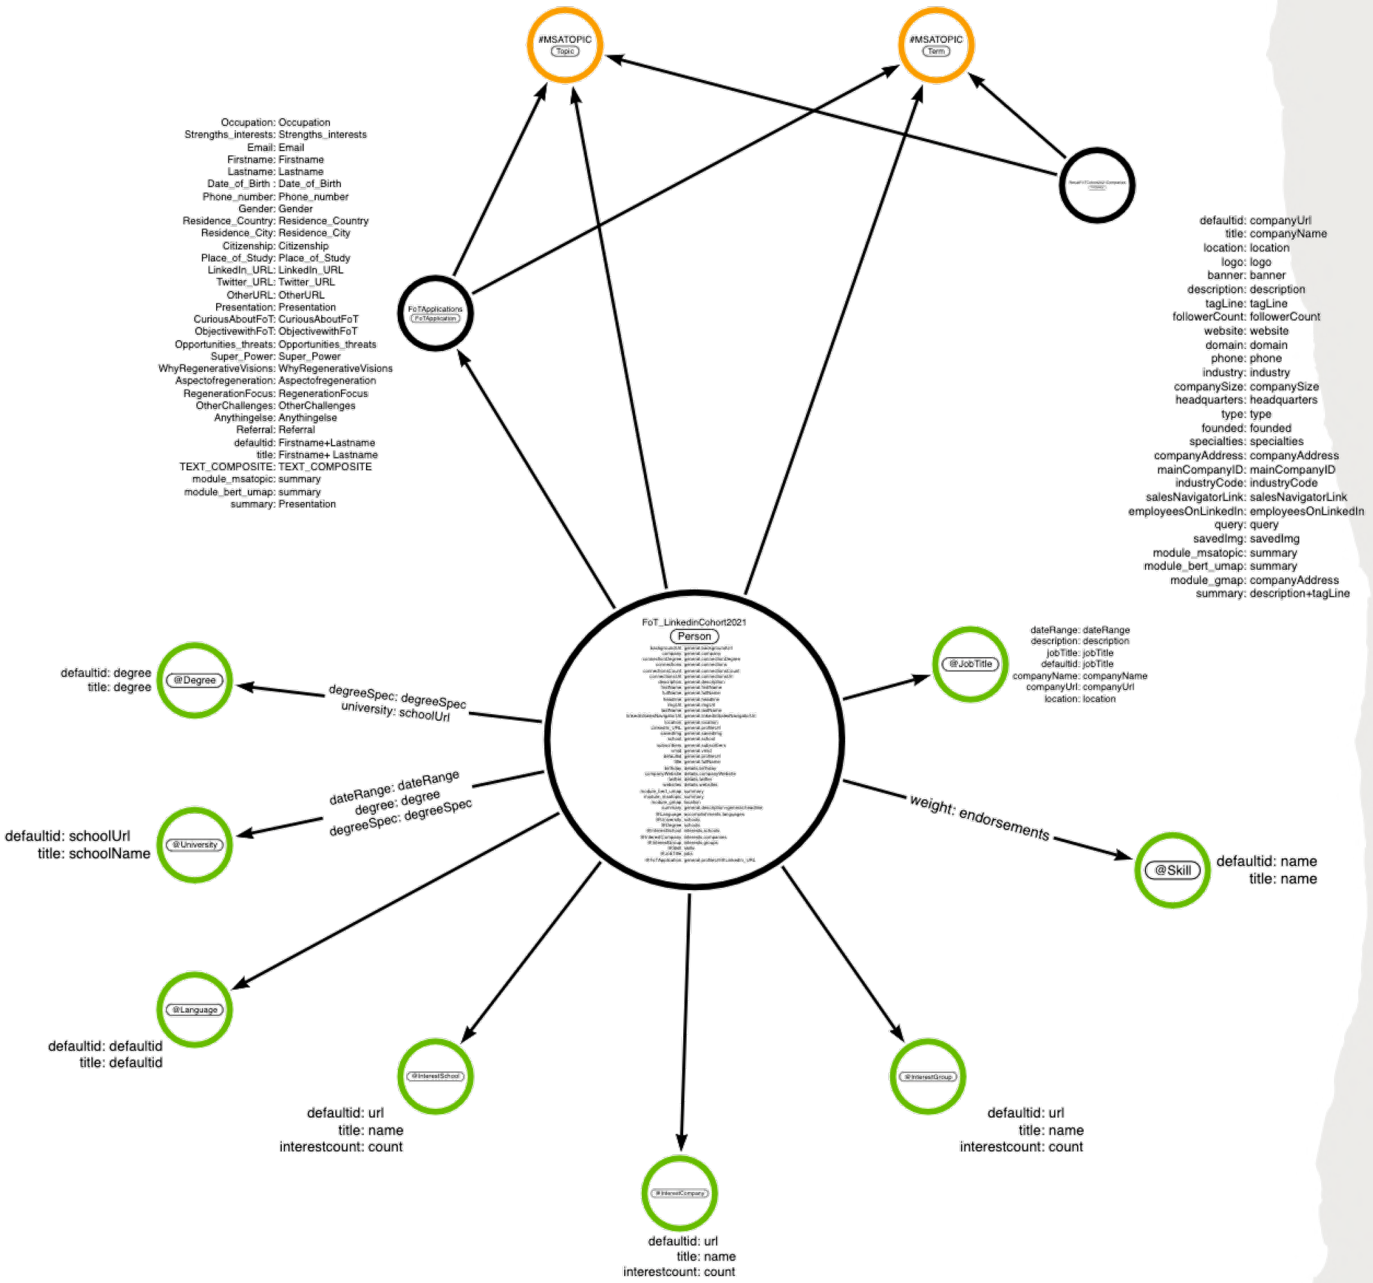
The Tree…

and the forest

Data

For those who provided explicit consent

- FoT Application
- LinkedIn Profiles
- Additional “place of work” information via company profiles



Methods

From Counting

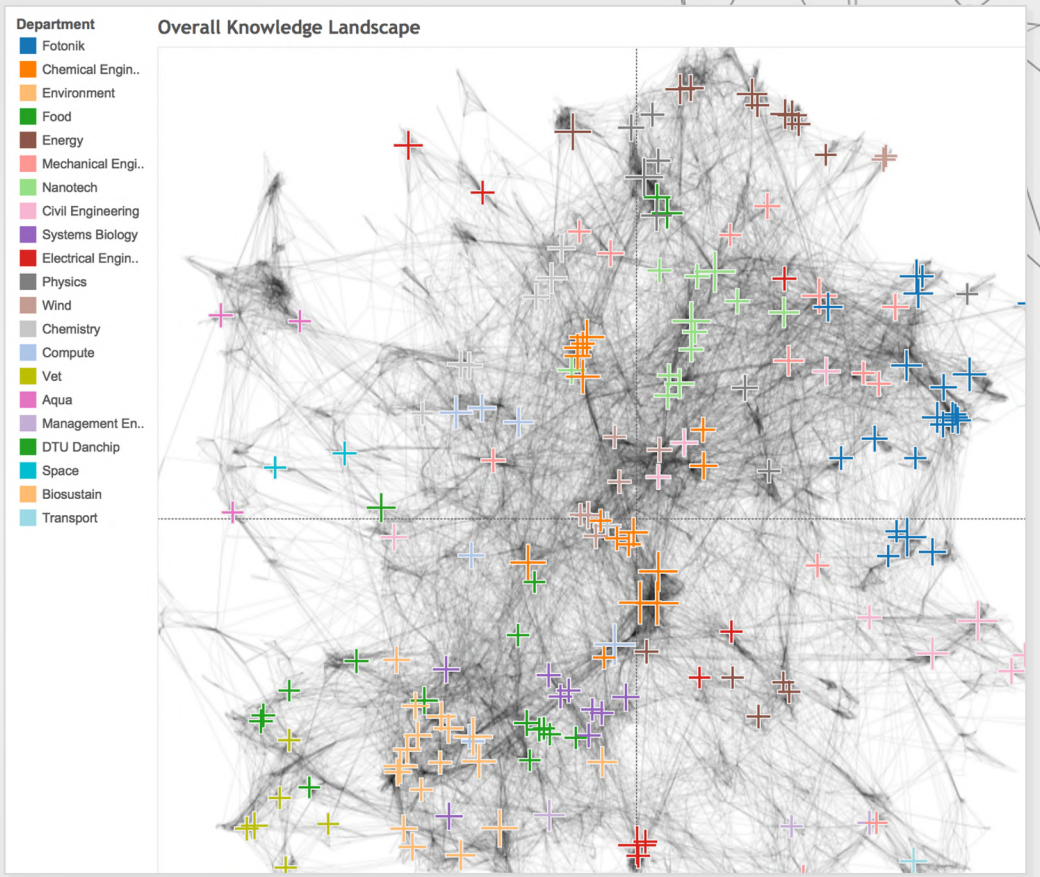
to Connecting

PICTURES: Wehrli, U., Born, G., & Spehr, D. (2013). The art of clean up: Life made neat and tidy. San Francisco: Chronicle Books.

From Counting

"A spreadsheet way of knowledge"

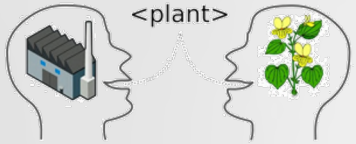
to Connecting



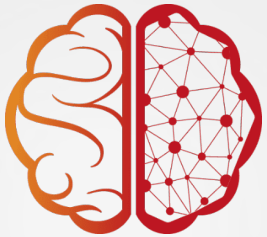
A connected way of knowledge
→ where relations matter

Connecting the dots…

Graph Analytics and Network Science



Natural Language Processing and Semantic Analysis



AI / Machine Learning
